Profile:

Bilingual professional (English/Spanish) focused on bridging the gap between technical complexity and operational efficiency. Proven track record of delivering digital transformation for small businesses and nonprofits by translating complex stakeholder needs into scalable cloud architectures.

Education:

B.A. Computer Science | Wabash College

May 2026

Relevant Coursework:

Database Programming, Algorithm Design & Analysis, Data Structures, Theory of Programming Language, Computer Systems Organization, Data Science, Programming Fundamentals, Computer Graphics Engineering.

Technical Skills:

Consulting & Strategy: Digital Transformation, Stakeholder Management, Workflow Automation, Bilingual.

Cloud & Architecture: AWS (EC2, S3, IAM, Lambda), Cloud Migration, Relational Database Design.

Software Development: Python, SQL, C, TypeScript, PostgreSQL, REST APIs, Figma, LLMS

Certifications:

- **AWS Certified Cloud Practitioner** – Amazon Web Services

April 2026

Experience:

Founder & Owner – CutbyOliver

Aug. 2021 - Present

Crawfordsville, IN.

- Scaled a service-based venture to a 200+ client base by conducting a market needs analysis and implementing a custom CRM and digital scheduling pipeline to optimize client engagement.
- Optimized end-to-end business operations, automating client communications and financial tracking to maintain a 100% reliability rate while managing full-time academic rigor.

Database Developer Intern - Montgomery County Free Clinic

Sept. 2025 – Dec. 2025

Crawfordsville, IN.

- Spearheaded a cloud migration project for a nonprofit healthcare provider, moving legacy paper-based records to a secure, ACID-compliant PostgreSQL architecture.
 - Collaborated directly with clinic staff to map and translate complex healthcare workflows into a functional technical solution that reduced patient processing time.
-

Projects:

Montgomery County Free Clinic: Digital Intake Solution (React, Typescript, SQL, Supabase)

- Engineered a full-stack digital intake system using React and Supabase, enabling communication with stakeholders to migrate a legacy paper-based process to a PostgreSQL cloud architecture.
- Optimized data integrity and reduced administrative patient processing time by implementing real-time Form Validation and relational schema constraints.

Cloud-Based Business Solutions: Green Valley Storage, Jacky Bouquets, Web portfolio (S3, CSS, Astro, Netlify)

- Provided technical consulting for small business owners to establish digital footprints and optimize SEO visibility.
- Leveraged AWS S3 and modern frontend practices to build high-performance, maintainable platforms that improved client customer acquisition.
